KEVIN PHAM

Seattle, WA | (253) 653-2102 | kevinpham4830@gmail.com | kevinpham.page | github.com/knp4830

EDUCATION

New York University, College of Arts and Sciences — **New York, NY**
B.A. in Economics & Computer Science, Minor in Mathematics — May 2026
Relevant Coursework: Data Structures, Algorithms, Operating Systems, Computer Systems Organization, Software Engineering, Agile Software Development, Object-Oriented Programming

New York University Madrid — **Madrid, Spain**
Study Abroad — Aug 2024 – Dec 2024

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Java, C, C++, HTML/CSS, R
Frameworks & Libraries: React, Next.js, Electron, FastAPI, Flask, Tailwind CSS
Databases: PostgreSQL, Supabase, SQLite, MongoDB, Redis (NoSQL)
DevOps & Tools: Git, GitHub Actions, Docker, Vercel, DigitalOcean, pytest, Vitest
AI Tools: Claude Code, Codex, Multi-Agent Orchestration
Concepts: REST APIs, Microservices, Full-Text Search, Row-Level Security, Dynamic Programming, Memoization, Monte Carlo Simulation, Concurrency, Unit Testing, CI/CD, Agile/Scrum

EXPERIENCE

ReuMo (Nonprofit, Fiscally Sponsored by Seattle Parks Foundation) — **Seattle, WA**
Web Developer — Jun 2023 – Present

- Built and maintained the company website (HTML, CSS, JavaScript) presenting moss-based stormwater filtration kits to customers, partners, and grant reviewers, supporting **$78K+** in grants and prizes.
- Helped secure **$42K** in 2026 King County grants (**$30K** Member Jurisdiction, **$12K** WaterWorks) to bring green stormwater education to Kent School District classrooms.
- Ran customer discovery behind **$36K** in 2023 awards (VentureWell **$5K** and **$20K**, PreCycle **$10K** grand prize, NSF I-Corps **$1K**); **Top 12** finalist, NextCycle Washington 2025.

OBAO Hell's Kitchen — **New York, NY**
Server & Bartender — Jul 2025 – May 2026

- Managed **10+** tables per shift in a high-volume Manhattan restaurant and bartended during morning shifts, coordinating in real time with kitchen and front-of-house staff to prioritize orders.

PROJECTS

Minced | Full-Stack Recipe & Nutrition Platform — **Dec 2025 – Present**
Next.js 15, TypeScript, PostgreSQL, Supabase, Tailwind CSS, Vercel — minced.kevinpham.page

- Built a live beta recipe platform whose pantry matcher ranks **957** recipes by fewest missing ingredients, with filtering and typo-tolerant full-text search in PostgreSQL functions secured by row-level security.
- Built a SQL nutrition engine computing **35** nutrients per recipe from **10,000+** foods (USDA, UK, and Canadian databases), validated against USDA values with a **6.0%** median calorie error and **81.6%** of recipes within 15%.
- Orchestrated parallel AI agents on per-feature branches with an integration step and independent auditor agents that re-verified nutrition data against source databases before each release.

Blackjack Odds Calculator | Desktop Analytics Tool — **Jun 2026 – Present**
TypeScript, React, Electron, Web Workers, Vitest

- Built an Electron and React desktop app that computes exact EV and win/push/loss odds for every blackjack action using recursive dynamic programming with memoization over deck composition.
- Cut full-board solve time from **14.9s** to **1.3s** (**11x**) with numeric memo keys, typed-array dealer walks, and an **11**-worker Web Worker pool; Monte Carlo simulator runs **~280K** hands/sec.
- Verified correctness with **1,086** Vitest unit and property-based tests and a **10M**-hand seeded simulation cross-check, matching published house edges and the basic strategy chart cell for cell.

PolyPaper | Prediction-Market Paper Trading Platform — **Dec 2025**
Python, Flask, FastAPI, MongoDB, Redis, Docker, DigitalOcean — GitHub

- Built a Polymarket-style paper trading app on a **5**-person Agile team, with FastAPI microservices proxying live market and price data behind Redis caching and retry/backoff logic.
- Set up GitHub Actions CI/CD enforcing pytest with **80%** minimum coverage plus pylint and Black checks, building Docker images, and auto-deploying to DigitalOcean on every push to main.
